PROFESSIONAL SUMMARY

Data oriented professional with a B.Tech in Computer Science (Data Science specialization) and hands on experience in MIS reporting, Excel/Power BI analysis, and AI driven applications including RAG (Retrieval Augmented Generation) systems. Currently contributing to a GenAI based product at a startup, with prior experience handling large scale project data at an EPC organization. Seeking to transition into a Data Analyst, AI-ML Engineer, Data Scientist, Data Engineer etc.

SKILLS

Technical: Python, Machine Learning, Feature Engineering, EDA (Exploratory Data Analysis), Data Visualization, RAG (Retrieval Augmented Generation), MS Excel (Pivot Tables, VLOOKUP/HLOOKUP, Formulas, Automation), Power BI, ETL (Extract, Transform, Load), SQL.

Domain: MIS Reporting, Data Analysis, Document & Data Management, Client Requirement Analysis

Soft Skills: Cross functional Coordination, Problem Solving, Debugging & Error Handling

WORK EXPERIENCE

Jr. AI-ML Engineer | *Tattvera Technologies*

Apr 2026 – Present

- Contributed to development of an AI based automated interview system involving CV ranking and skill matching using RAG (Retrieval Augmented Generation)
- Performed data analysis to support product decisions and client requirement understanding
- Assisted in identifying target audience segments and shaping product positioning
- Worked on debugging and error handling across product features
- Collaborated flexibly across data, product, and technical tasks in a fast paced startup environment

Document Controller (MIS & Data Analysis) | *L&T Energy Hydrocarbon (via Apex Infralink Limited)*

May 2025 – Mar 2026

- Managed physical and digital project documents and data for the Numaligarh Refinery Project, Assam
- Collected, verified, and consolidated project data from Engineering, Procurement, and Construction (EPC) teams to support planning and MIS reporting.
- Performed data analysis using MS Excel — pivot tables, VLOOKUP/HLOOKUP, formulas — with automation via conditional formatting and reusable templates
- Extracted and transformed Excel based data for visualization using Power BI, supporting basic ETL processes
- Tracked document revisions and version control, ensuring accurate data was used in planning and execution
- Coordinated across EPC teams to ensure timely, accurate flow of information

EDUCATION

B.Tech, Computer Science Engineering (Data Science Specialization)

MCKV Institute of Engineering, Howrah | Nov 2020 – Jul 2024

CGPA- 8.3

Data Science Masters Program Course

PW SKILLS

| Aug 2024 – Feb 2025

82%

Python, Machine Learning, Feature Engineering, EDA, Data Visualization; built 2–3 applied projects

PROJECTS

Weather Forecasting Model — *Python, Pandas, Scikit-learn*

Built a machine learning model to predict weather conditions using historical meteorological data. Applied data cleaning, feature engineering, and predictive modeling techniques.

Titanic Survival Prediction — *Python, Pandas, Scikit-learn, Matplotlib/Seaborn*

Developed a classification model to predict passenger survival on the Titanic dataset, applying exploratory data analysis (EDA) and machine learning algorithms to identify key survival factors.

Data Visualization Dashboard — *Power BI, Excel*

Created interactive dashboards and visual reports to analyze and present data driven insights, translating raw datasets into clear, business friendly visuals.
